

OpenDataStore (ODS) is a platform that gives true power to open data and offers numerous solutions for empowering smart cities, regions and states to open up towards citizens.

ODS DataStage is a software solution that enables you to easily publish public sector information in accordance with Directive 2003/98/EC and Directive 2013/37/EU. It's possible to connect your ODS DataStage solution with government's or your own open data portal which makes it easy to publish your data there. If you are interested in getting one, contact us!

Required steps for publishing open data in your institution:

- 1) Categorizing your internal data
- 2) Selecting open data suitable for publishing
- 3) Getting selected data sets ready for publishing
- 4) Data publish!

When publishing data in accordance with Directives, you are contributing to transparency together with having a better insight in your institution's resources. If you have any questions about ODS DataStage, don't hesitate to contact us: info@omega-software.hr

WHAT IS OPEN DATA?

Open data is all information intended for use by persons or legal entities of documents held by public sector bodies, for commercial or non-commercial purposes other than the initial purpose within the public task for which the documents were produced.

This definition excludes personal data as well as other classified data held secret because of national security. It usually includes meteorological data, different registers, records, statistical or financial data.

According to Directives, public bodies are obligated to make documents containing such data available to public for commercial and non-commercial reuse.

OMEGA SOFTWARE HELPS YOU

- 1) Evaluate your 'AS-IS' state and analyzes data sources
- 2) With implementing ODS DataStage solution
- 3) Train your employees in preparing data sources, configuring and maintaining ODS DataStage
- 4) Educate your employees in charge of publishing data on how to use ODS DataStage
- 5) With initial installment of ODS DataStage

We offer ODS DataStage as a leased service on Microsoft Azure cloud platform which means that no infrastructure or servers are required on your part.

ODS DATASTAGE ENABLES YOU TO

- 1) Define desired data sources
- 2) Easily add new data sets
- 3) Have a clear view of prepared data sets
- 4) Describe your data according to your country's nomenclature
- 5) Transform your data into 'machine-readable' format with one click
- 6) Get notifications when something changes on your data sources

ODS DataStage has a very simple and intuitive interface. With simply opening the solution you get a clear, detailed and accurate insight into gathered data sets, with the possibility of choosing which of those will be publicly available.
